PROFESSIONAL SUMMARY

Detail-oriented Computer Science student with hands-on experience in full-stack development, automation, and AI integration. Proficient in building responsive web applications and automation workflows using JavaScript, Node.js, MongoDB, and React. Recently worked as a Frontend & AI Developer Intern at Galipea Molecules Pvt. Ltd., building an AI-based appointment booking chatbot and automation workflows that improved client engagement and scheduling efficiency.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Frontend: React.js, Vite, Tailwind CSS

Backend: Node.js, Express.js, Socket.io, REST APIs, JWT Authentication

Databases: MongoDB, MySQL, Supabase

Tools & Platforms: Git, GitHub, Render, Vercel, n8n, Gemini API, Cursor, Windsurf

Automation: Workflow Automation, Webhooks, Google Sheets Integration

EXPERIENCE

Frontend & AI Developer Intern — Galipea Molecules Pvt. Ltd.

Jul 2025 – Dec 2025

- Built an AI-powered appointment booking chatbot to automate client scheduling and responses.
- Developed frontend dashboards for managing appointments, analytics, and chatbot responses.
- Integrated n8n workflows with APIs and databases, collaborating with the backend team to improve chatbot logic.
- Improved company scheduling efficiency by reducing manual tasks through automation.

Web Developer Intern — CodeClause

Oct 2024 – Nov 2024

- Worked on web applications using HTML, CSS, and JavaScript; backend with Node.js, RESTful APIs, and MongoDB.
- Improved UI design, backend logic, and integration of full-stack components.

PROJECTS

Gupshup — Real-time MERN Chat App

March 2026 | Live Demo | GitHub

Tech Stack: MongoDB, Express.js, React, Node.js, Socket.io, JWT, Render, Vercel

- Built a full-stack real-time chat application with 1-to-1 and group messaging powered by Socket.io rooms.
- Implemented JWT authentication, online presence, typing indicators, read receipts, friend requests, and photo sharing.
- Deployed backend on Render and frontend on Vercel with MongoDB Atlas; mobile-responsive UI.

AI-Based Job Alert Automation System

Mar 2024 – Present

Tech Stack: n8n, Supabase, Google Sheets, Twilio, React, Vite, Node.js

- Developed an automation system that sends personalized fresher job alerts via WhatsApp based on LinkedIn listings, using n8n workflows to fetch and filter jobs by keyword, location, and work type.
- Used Supabase to store and track sent jobs to avoid duplication; designed React frontend for preferences.
- Integrated Twilio API for WhatsApp notifications and supported 24x7 scheduling via Render.

AI Appointment Booking Chatbot (Company Project)

Jul 2025 – Oct 2025

- Designed and developed an AI chatbot that automates appointment scheduling, integrating with company systems via n8n and Node.js for data syncing and real-time notifications.
- Built a responsive frontend UI for managing bookings using React and Tailwind CSS.
- Implemented smart slot management reducing double-bookings; added admin analytics dashboard.

EDUCATION

B.Tech, Computer Science Engineering — Meri College of Engineering and Technology, MDU University

2021 – 2025

Core Subjects: Data Structures & Algorithms (DSA), Operating Systems, DBMS, Computer Networks, OOPs, Python Programming

Built strong foundations in problem-solving, system design, and full-stack development through coursework and hands-on projects. Active in tech workshops, coding contests, hackathons, and open-source contributions.

Senior Secondary (PCM) — CBSE Board, New Delhi

Focus: Physics, Chemistry, Mathematics; 62%. Participated in coding events and science fairs.
